Application for the position of BACKEND DEVELOPER
To: Alex Phan
Location: 130 Dien Bien Phu
**Street, Thanh Khe District, Da**
Nang City

Dear Alex Phan,

I am excited to apply for the Backend Developer Intern position at AvePoint. As a Software Engineering student at Duy Tan University, I am eager to contribute my skills in backend development to your team.

During my studies, I developed backend systems using Node.js, Express, and MongoDB. One of my key projects was building a RESTful API for an e-commerce platform that handled user authentication, order management, and secure transactions. This experience enhanced my problem-solving skills and understanding of backend architecture.

I am proficient in JavaScript, Node.js, MongoDB, REST APIs, and Git, and I am always eager to learn new technologies. What excites me most about AvePoint is your commitment to delivering scalable, secure solutions with global impact.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to AvePoint's mission.

Sincerely,

Tran Quoc Vi
